A New Canadian Resource for Saskatchewan's Environmental Science 20 Course

Visualizing the Environment, Canadian Edition focuses on environmental sustainability and teaches students the principles of understanding the biological, physical, and socioeconomic attributes of the environment. It centers on problems that have resulted from human activities, and most importantly looks at a diversity of solutions and actions that can be taken to ensure the future well-being of our Earth.

Focus on Inquiry, Focus on Process, Focus on Doing Supported by State of the Art Visuals

Visualizing the Environment, Canadian Edition follows a fresh approach to Environmental Science. Wiley, in partnership with National Geographic, has created a visually-focused text designed to uniquely address the processing style of today's student by making material accessible and engaging without sacrificing content.

Key Features:

WHAT A SCIENTIST SEES highlights a concept or phenomenon using photos and figures that would stand out to a professional in the field, helping students to develop observational skills.

ENVIRODISCOVERY provides additional topical material about relevant environmental issues.

The illustrated CASE STUDIES that cap off the text sections of each chapter offer a wide variety of in-depth examinations that address important issues in the field of environmental science.

Table of Contents:

Foreword
Preface
1. The Environment
2. Environmental History, Jurisdictional Authority, and Sustainability
3. Human Populations
4. Human Health and Environmental Hazards
5. How Ecosystems Work
6. Ecosystems in the Environment
7. Conservation of Biological Diversity
8. Land Resources
9. Aquatic Resources, Uses, and Management
10. The Atmospheric Environment
11. Energy Resources
12. Wastes in the Environment
13. Achieving our Preferred Future Environment

Wiley is supporting your "No Textbook/Buy Multiple Text" Philosophy by Offering FREE Access to Our Instructor's Companion Site!

Resources Available on The Instructors Companion Site:

✓ **Premier Media Program**: Rich array of media and supplements that incorporate the visuals from the textbook extensively to form a pedagogically cohesive package.

✓ **Videos**: A collection of videos from the award-winning National Geographic Film Collection have been selected to accompany the text.

✓ **PowerPoint Presentations and Image Gallery**: PPTs tailored to the text's coverage and learning objectives. All photos, figures, maps, and other visuals are available online.

✓ **Web Site**: Tutorial Animations on the web developed to visually support the learning of difficult concepts, processes, or theories, many of them built around a specific text feature such as a Process Diagram or other key visual in the chapter.

✓ **Test Bank**: Has approximately 1200 test items, with at least 25 percent incorporating visuals from the book.
